Meeting user stories	P1.1	Project is deployed to a custom Netlify URL.	Presentation / Code	The user story was met.	Attempt at meeting user story made, but the definition of done is not met yet.	The user story was not met.		
	P1.2	All views in the app display correctly on the smallest mobile device available, "iPhone SE".		The user story was met.	Attempt at meeting user story made, but the definition of done is not met yet.	The user story was not met.		
	P1.3	All favicon information has been created and added correctly via https://realfavicongenerator.net/ (you are welcome to use any free PNG image you find on https://www.flaticon.com/).	Presentation / Code	The user story was met.	Attempt at meeting user story made, but the definition of done is not met yet.	The user story was not met.		
	P1.4	All meta tag information has been created and added via https://metatags.io/. All URL values (especially image URLs) are absolute Netlify URL values.		The user story was met.	Attempt at meeting user story made, but the definition of done is not met yet.	The user story was not met.		
	P1.5	All show data is loaded via a fetch call from https://podcast-api.netlify.app/shows.	Presentation / Code	The user story was met.	Attempt at meeting user story made, but the definition of done is not met yet.	The user story was not met.		
	P1.6	When viewing a specific show, data is loaded via a fetch call from an individual show endpoint.		The user story was met.	Attempt at meeting user story made, but the definition of done is not met yet.	The user story was not met.		
	P1.7	There is a loading state while the initial data is being loaded.	Presentation / Code	The user story was met.	Attempt at meeting user story made, but the definition of done is not met yet.	The user story was not met.		
	P1.8	There is a loading state while new data is being loaded.		The user story was met.	Attempt at meeting user story made, but the definition of done is not met yet.	The user story was not met.		
	P1.9	User can view the details of a show broken down into seasons, sorted by number.	Presentation / Code	The user story was met.	Attempt at meeting user story made, but the definition of done is not met yet.	The user story was not met.		
	P1.10	User can listen to any episode in a season of a show.		The user story was met.	Attempt at meeting user story made, but the definition of done is not met yet.	The user story was not met.		
	P1.11	User can see a view where only episodes for a specifically selected season are shown.		The user story was met.	Attempt at meeting user story made, but the definition of done is not met yet.	The user story was not met.		
	P1.12	User can toggle between different seasons for the same show.		The user story was met.	Attempt at meeting user story made, but the definition of done is not met yet.	The user story was not met.		
	P1.13	User can see the name of all available shows on the platform.		The user story was met.	Attempt at meeting user story made, but the definition of done is not met yet.	The user story was not met.		
	P1.14	User sees preview images of shows when browsing.		The user story was met.	Attempt at meeting user story made, but the definition of done is not met yet.	The user story was not met.		
	P1.15	User sees the amount of seasons per show as a number when browsing.		The user story was met.	Attempt at meeting user story made, but the definition of done is not met yet.	The user story was not met.		
	P1.16	User sees a human-readable date as to when a show was last updated.		The user story was met.	Attempt at meeting user story made, but the definition of done is not met yet.	The user story was not met.		
	P1.17	User sees what genres (as genre titles) a show is associated with when browsing.		The user story was met.	Attempt at meeting user story made, but the definition of done is not met yet.	The user story was not met.		
	P1.18	User sees a preview image of seasons for a specific show.	Presentation / Code	The user story was met.	Attempt at meeting user story made, but the definition of done is not met yet.	The user story was not met.		
	P1.19	User sees the amount of episodes in a season as a number.		The user story was met.	Attempt at meeting user story made, but the definition of done is not met yet.	The user story was not met.		
	P1.20	User can go back to a show view from a season-specific view.		The user story was met.	Attempt at meeting user story made, but the definition of done is not met yet.	The user story was not met.		
	P1.21	User can mark specific episodes as favourites to find them again.	Presentation / Code	The user story was met.	Attempt at meeting user story made, but the definition of done is not met yet.	The user story was not met.		
	P1.22	User can visit a view where they see all their favourites.		The user story was met.	Attempt at meeting user story made, but the definition of done is not met yet.	The user story was not met.		
	P1.23	User can see the show and season of any episode in their favourites list.		The user story was met.	Attempt at meeting user story made, but the definition of done is not met yet.	The user story was not met.		
	P1.24	Episodes related by season/show are grouped in favourites.		The user story was met.	Attempt at meeting user story made, but the definition of done is not met yet.	The user story was not met.		
	P1.25	User is able to remove episodes from their favourites.		The user story was met.	Attempt at meeting user story made, but the definition of done is not met yet.	The user story was not met.		
	P1.26	User can arrange the list of shows by title from A-Z.	Presentation / Code	The user story was met.	Attempt at meeting user story made, but the definition of done is not met yet.	The user story was not met.		
	P1.27	User can arrange the list of shows by title from Z-A.		The user story was met.	Attempt at meeting user story made, but the definition of done is not met yet.	The user story was not met.		
	P1.28	User can arrange the list of shows by date updated in ascending order.		The user story was met.	Attempt at meeting user story made, but the definition of done is not met yet.	The user story was not met.

	P1.29	User can arrange the list of shows by date updated in descending order.		The user story was met.	Attempt at meeting user story made, but the definition of done is not met yet.	The user story was not met.		
	P1.30	User can filter shows by title through a text input.		The user story was met.	Attempt at meeting user story made, but the definition of done is not met yet.	The user story was not met.		
	P1.31	User can find shows based on fuzzy matching of strings (you can use something like https://fusejs.io/).		The user story was met.	Attempt at meeting user story made, but the definition of done is not met yet.	The user story was not met.		
	P1.32	Automatically filter shows by genre if the genre label is clicked on.		The user story was met.	Attempt at meeting user story made, but the definition of done is not met yet.	The user story was not met.		
	P1.33	User sees the date and time that an episode was added to their favourites list.	Presentation / Code	The user story was met.	Attempt at meeting user story made, but the definition of done is not met yet.	The user story was not met.		
	P1.34	User can arrange favourites by show title from A-Z.		The user story was met.	Attempt at meeting user story made, but the definition of done is not met yet.	The user story was not met.		
	P1.35	User can arrange favourites by show title from Z-A.		The user story was met.	Attempt at meeting user story made, but the definition of done is not met yet.	The user story was not met.		
	P1.36	User can arrange favourites by date updated in ascending order.		The user story was met.	Attempt at meeting user story made, but the definition of done is not met yet.	The user story was not met.		
	P1.37	User can arrange favourites by date updated in descending order.		The user story was met.	Attempt at meeting user story made, but the definition of done is not met yet.	The user story was not met.		
	P1.38	Audio player shows current progress and episode length as timestamps.	Presentation / Code	The user story was met.	Attempt at meeting user story made, but the definition of done is not met yet.	The user story was not met.		
	P1.39	Audio player is always visible, so the user can listen to episodes while they browse.		The user story was met.	Attempt at meeting user story made, but the definition of done is not met yet.	The user story was not met.		
	P1.40	User is prompted to confirm they want to close the page when audio is playing.		The user story was met.	Attempt at meeting user story made, but the definition of done is not met yet.	The user story was not met.		
	P1.41	App remembers which show and episode the user listened to last when returning to the platform.	Presentation / Code	The user story was met.	Attempt at meeting user story made, but the definition of done is not met yet.	The user story was not met.		
	P1.42	App remembers which shows and episodes the user listened to all the way through.		The user story was met.	Attempt at meeting user story made, but the definition of done is not met yet.	The user story was not met.		
	P1.43	App remembers the timestamp where the user stopped listening within a 10-second accuracy period of closing.		The user story was met.	Attempt at meeting user story made, but the definition of done is not met yet.	The user story was not met.		
	P1.44	App remembers and shows the timestamp progress of any episode the user has started listening to.		The user story was met.	Attempt at meeting user story made, but the definition of done is not met yet.	The user story was not met.		
	P1.45	User can "reset" all their progress, effectively removing their listening history.		The user story was met.	Attempt at meeting user story made, but the definition of done is not met yet.	The user story was not met.		
	P1.46	User is presented with a sliding carousel of possible shows they might be interested in on the landing page.	Presentation / Code	The user story was met.	Attempt at meeting user story made, but the definition of done is not met yet.	The user story was not met.		
	P1.47	User can log in via https://app.supabase.com authentication.	Presentation / Code	The user story was met.	Attempt at meeting user story made, but the definition of done is not met yet.	The user story was not met.		
	P1.48	User favourites are stored in https://app.supabase.com database.		The user story was met.	Attempt at meeting user story made, but the definition of done is not met yet.	The user story was not met.		
P1.49	User favourites are automatically synced when logged in, ensuring they share favourites between devices.	The user story was met.		Attempt at meeting user story made, but the definition of done is not met yet.	The user story was not met.			
P1.50	User can share their favourites as a publicly accessible URL.	The user story was met.		Attempt at meeting user story made, but the definition of done is not met yet.	The user story was not met.			
The next part of the rubric will count double-marks. If the minimum requirements are not met, marks will be deducted instead of 0 being awarded.								
				4	2	-4		
The project, project brief and overall assessment	P2.1	The student understood and followed the project brief.	Presentation / Code	The student understood and followed the project brief.	The student somewhat understood and followed the project brief.	The student did not understand or follow the project brief.		
	P2.2	The project's commit history shows short and clear commit messages.		The project's commit messages are short and clear.	Some of the project's commit messages are short and clear.	None of the commit messages are short or clear.		
	P2.3	The student was well prepared to present their project and answer questions.		The student had prepared well for the presentation.	The students was somewhat prepared for the presentation.	The student was not prepared at all for the presentation.		
	P2.4	The project has a good appearance and layout when opened in a web browser.		The appearance and layout are excellent.	Some effort was put in to improve the appearance and layout.	No effort was made to improve the appearance and layout.		
	P2.5	The project is easy to navigate and interact with through a web browser.		The project provides easy navigation and interaction.	The project is somewhat easy to navigate and interact with.	The project is not easy to navigate or interact with at all.
